

PENSION BENEFIT GUARANTY CORPORATION

Semiannual Report to the Congress

Management's Response to the OIG Semiannual Report:

October 1, 2017 – March 31, 2018

Office of the Director

PENSION BENEFIT GUARANTY CORPORATION

SEMIANNUAL REPORT TO THE CONGRESS

The Pension Benefit Guaranty Corporation is resolute in our mission to improve the retirement security for millions of Americans.

Through its dedicated, independent work, PBGC's Office of Inspector General (OIG) is fundamental to our success in serving the public. During the reporting period, PBGC has been working diligently to address the OIG recommendations, resulting in the lowest open inventory in years. We continue to focus on information security, the modernization of PBGC's key benefits-related information technology systems, and the transparency and accountability of our professional services contracting, which the OIG has cited as management challenges.

Since its inception, PBGC has worked hard to preserve plans, protect plan participants and ensure that participants in trustee plans and their beneficiaries receive timely, uninterrupted benefits. Last year, PBGC attained its 25th consecutive unmodified audit opinion, and maintained, in all material respects, effective internal control over financial reporting.

Building on our record of promoting stewardship and accountability, PBGC places a great emphasis on internal controls. We continue to make significant progress in implementing the latest update to the Office of Management and Budget's Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. PBGC's Internal Control Committee (ICC) meets regularly to oversee the implementation of improved controls across the agency. Our Risk Management Council (RMC), chaired by PBGC's Risk Management Officer, met frequently through the reporting period as well. The implementation of Enterprise Risk Management will help us better prioritize and manage risks facing PBGC.

Table 1 presents resolved audit reports issued prior to April 1, 2017, which contain recommendations that remain open. I am pleased to report that PBGC has closed more than 75 percent of the recommendations in these reports. Table 2 details OIG reports requiring final action.

In addition to our continued focus on internal controls to address the important issues raised by our OIG, I remain keenly focused on risks facing PBGC insurance programs, particularly with respect to the Multiemployer Insurance Program, which continue to be reported in the Government Accountability Office's High Risk List and are now the subject of a joint select committee of the Congress.

Our work with the Congress, the PBGC Board of Directors, and our Office of Inspector General is critical in carrying out PBGC's vital mission.

W. Thomas Reeder
Director
